In each level, we are waiting for at least one enemy, a chest with a random artifact and sometimes different statues. Pay a few coins you can get from a statue as a blessing on many levels, giving us various bonuses, such as vampires. In the chest you can find magic scrolls (knights can not use), cold weapons and all kinds of elixir. If the enemy is too strong, for example, it is a dragon, you can run away from him, ignore and not allow him to reach us. When we die, we will return to the main menu, and if we have enough gold, we will be able to unlock new heroes: magicians, cyps, etc. Each of them has their own unique skills. Dubbing is appropriate and as a result the game is almost indistinguishable from the old pixel role-playing games of the 90s. твердую пятерку!
